

STAND ALONE DVR

Standalone are high-performance premium digital video recorders. It's stable & unique features make it outstanding at the same category. The SH-series are designed for the use in complex surveillance application. The KG-SH330/KG-SH530 offer the maximum storage capacity up to 8 terabytes (4 SATA HDD, each support up to 2TB). This professional series are also offering a variety of features including real-time video display, software upgrade from USB or remote site, USB DVD-RW backup, e-mail notification, NAS supported.

Stand Alone DVR System

KG-SH130 / KG-SH330 / KG-SH530 Ideal Design for High-end Security Integration Projects

FEATURES

- Support DDNS
- External DVD-RW & USB HDD Supported (Backup)
- POS/CMS integration (support access from remote site)
- Two way Audio communication capabilities
- Simple USB Backup & SD Card
- Digital watermark to prevent film to be altered
- Playback search by time or event (alarm, motion, video loss, POS)
- Up to 2 SATA HDD for 4ch & 4 SATA HDD for 9/16ch DVR
- Free bundle powerful CMS IE remote management software, control up to 64ch on one screen.
- Playback recorded video via IE software (Max. 64chs)

DVR CARD

The digital surveillance kits range from KG901 entry level model to KG3480 high end 480 display model. Apart from the recording function, all surveillance kits are able to support remote control via IE, PTZ control, alarm notification, image saving and backup functions. Now! Vertically integrate our CMS2000 with Kguard digital surveillance kits to magnify the application capacity of your surveillance system.

MODEL	KG-901D	KG-902D	KG-904B	KG-908B
FPS	30	60	120	240
Channel	16	14	8	16
Audio	1Ch	2Ch	4Ch	16Ch

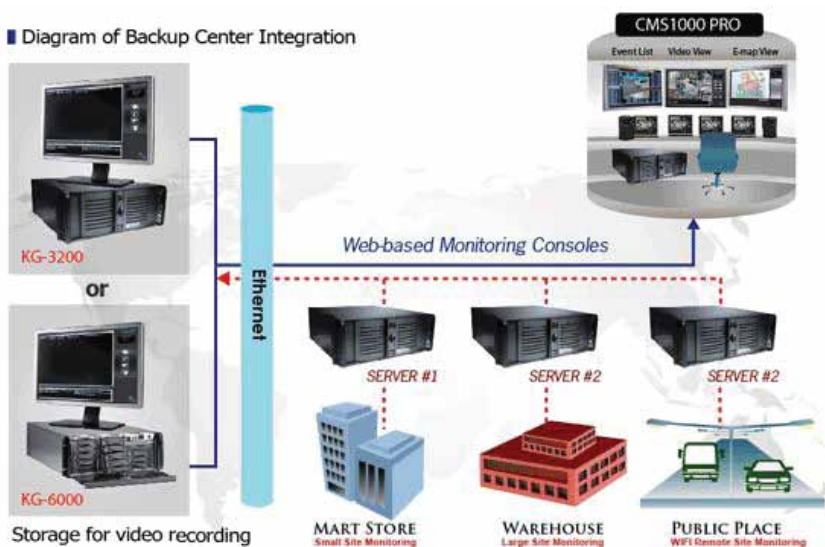

DVR SERVER

- Real-time MPEG-4 and Motion JPEG
- Compression (Dual Codec) in all resolutions
- Simultaneous MPEG-4 and Motion JPEG dual streams
- Support Two-way Audio
- Support RS485 for controlling PTZ / Dome
- Cameras remotely
- Supports 3GPP Mobile Surveillance

BACKUP CENTRE

Diagram of Backup Center Integration

OVERVIEW

With Kguard Backup Center solution allows users to build a steady data backup system for a mass number of surveillance systems via network system against any unpredictable disaster. Plus, users can also perform data search and retrieval functions from the data center via the internet.

- Storage capacity monitoring
- Centralized Remote Backup solution
- Efficient Data Management System & Efficient Data Retrieval:
- Smart Event Data Search / Time Specified Data Search

INTELLIGENCE VIDEO SUEVILLANCE (IVS)

Intelligent Video Surveillance is a smarter assisting software, helping to analyze and detect the individual behaviors of humans or objects and provide the real-time actions such as alarms, phone call/email notification.etc. to enhance your vigil places with a more secured watch and a better control.

KEY FEATURE

Missing Object

Suspicion Object

Directional Object Counting & Detection

Preset behavioural detection

APPLICATIONS

Anti-theft System

Terrorism bombing

Auto entrant count of a building

To prevent accidents
