Endeavour's AccessMaster provides an innovative and superior access control solution that enables organizations to protect and control, assets, properties, operations and information.

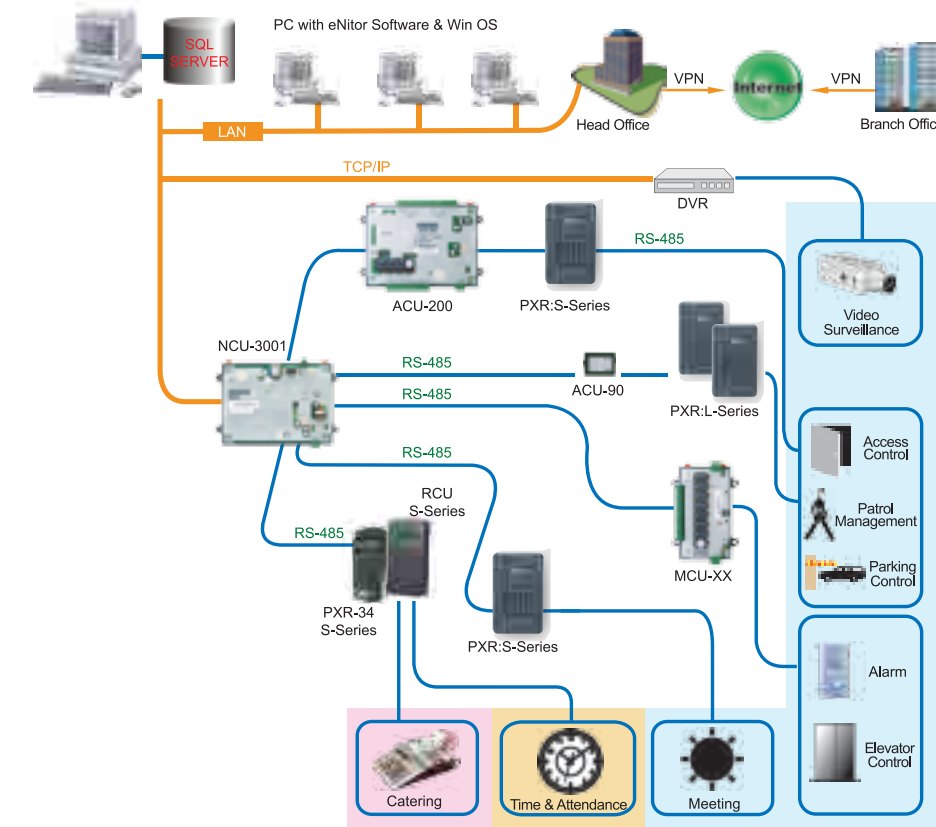

AccessMaster not only guarantees minimizing the risk of an unauthorized access and unwanted intrusion, but also lets you exercise full control on who's entering your premises. You can set up the system to pre-determine and permit who may go where, when, and under what conditions. And that's not all; AccessMaster can also be used to monitor hardware functionality and to raise an alarm or an alert if a particular device no longer responds

or if it is subjected to hardware failure or attack.

AccessMaster is also of invaluable assistance for an efficient crisis management when clearing the building in-case of fire or any other emergency.

AccessMaster is available with a variety of options and can be either Network-based or Stand-alone.

- Card for In & Out
- PIN only for In & Out
- Card and PIN for In & Out
- Fingerprint Reader for In & Out
- Fingerprint Reader for In & Card for Out

system architect

With its open architecture and user friendly approach, AccessMaster can be customized to be fully integrated with Time Attendance & Payroll systems, CCTV, Fire alarm, parking and elevator control, thereby providing an effective and efficient mechanism for building management.

### ADVANTAGES AND BENEFITS
